

2014 Advertising Campaign

BRIGHT SOLUTIONS

BRIGHT SOLUTIONS

Although at a first glance it might appear as a simple graphic refresh of 2013, this campaign dramatically changes its tone by engaging directly the customer and by shifting focus onto our product proposition.

In the 2014 campaign the attention shifts from the world to the path around it, stressing further the centrality of Sparkle's products. The colored dots that identify the product clusters have been transformed in icons to sustain further how Sparkle's products differentiate from the market.

The icons, which gain a central role in their representation, light up through Sparkle's light that itself illuminates the world with its "Bright Solutions", thus differentiating its offering with respect to a commoditized market.

Press

The Spark for your communications.
